

شركة أر دي بي السيف المحدودة  
**RDB-ELSEIF COMPANY LTD.**

# Introduction

---

- RDB-ELSEIF CO.LTD. A Saudi Company established in 2008
- Offer a complete precast concrete solution to all types of structures and projects.
- Two factories, one in Al-Kharj & one in Jazan
- Employing around 6,500 highly qualified engineers, specialist and skilled labors
- The Factory equipped with the latest technology in production of precast concrete elements.
- The factory has a production capacity of 51,000 cubic meters of precast concrete per month produced through full automated lines

# Our Core Values

---

- P**erformance : Our passion for everything connected to performance drives our approach to how we do business, from the design to the handing over of our products
- R**esponsibility : We recognize our social and ethical responsibility and we consistently fulfill the promises given to our Customers and Employees.
- E**xcellence : We deliver world class Quality products and services, achieving excellence each passing day
- C**apability : We offer to our Clients our Capability, built up over years of experience and learning
- A**ccountability : We acknowledge that our actions influence our customers, fellow employees, and the community in which we operate. We are committed to protecting the environment
- S**afety : We believe that injuries are preventable and we manage business operations to make it so
- T**eamwork : We are strongly committed to working together for mutual benefit and coordinated efforts

# Production Lines

---

1. **HOLLOWCORE SLABS**
2. **DOUBLE T SLABS**
3. **COLUMNS**
4. **PRESTRESSED BEAMS**
5. **BOUNDARY WALL, WALL PANELS & CLADDINGS**
6. **PRECAST STAIRS**
7. **MANY OTHER SPECIAL ELEMENTS**

# Hollowcore (HC) Slabs

## HC Thickness

150, 200, 250, 265, 300, 350, 400, 450, 500

Production Capacity 180,000 m<sup>3</sup>/Year

# Double Tee (TT) Slabs

Production Capacity 9,000 m<sup>3</sup>/Year

## TT thickness

(TT400/120,165,200),  
(TT500/120,165,200),  
(TT600/120,165,200),  
(TT700/120,165,200),  
(TT800/120,165,200),  
(TT900/120,165,200),  
(TT1000/120,165,200)

# Precast Columns

**3D-Precast-Column**

**Circular Precast Columns**

**Square Column**

**Production Capacity 13,200 m<sup>3</sup>/Year**

# Precast (Pre-Stressed) Beams

**Rectangle Beam**

**Inverted Beam**

**ledger Beam**

**Production Capacity 50,100 m<sup>3</sup>/Year**

# Boundary Wall , Wall Panels & Claddings

Insulated Panels

BW – Battery Mould

Sandblasted Solid Panels

Cladding

Production Capacity 358,800 m<sup>3</sup>/Year

# Precast Stairs

Available in any size and any quantity

# Many Other Special Elements

**Benches**

**New Jersey**

**Coping Beam**

**Parapet**

**Splash Block**

**Scupper**

**Box Culvert**

**Trellis**

Available in any size and any quantity

# Precast vs CIP

## ADVANTAGES OF PRECAST CONCRETE OVER CAST-IN-SITU CONCRETE

PRECAST CONCRETE	CAST-IN-SITU CONCRETE
Manufactured in a controlled casting environment therefor it is easier to control mix, placement and curing.	Poured on site and hence it is difficult to control mix, placement and curing.
With the ability to so tightly control the process, from materials to consolidation to curing, extremely durable concrete can be achieved.	Quality control and maintenance is difficult.
Weather is eliminated as a factor, can cast in any weather and get the same results, which allows to perfect mixes and methods	Climate can create problems for pouring, curing, and for construction itself.
Less labours are required	More labours are required
Precast construction is quick as it can be installed immediately and there is no waiting for it to gain strength	Construction is slow as gaining of strength requires time.
Precast elements can be cast in advance and stored until needed, thereby saves time.	Elements can't be casted in advance.
Speedy construction is possible.	Speed is less as elements are casted at site.
Total construction time is less as compared to cast-in-situ.	Total construction time is more as compared to precast.
Elements in varying lengths and shape can be developed.	There is constraint in length and shape of element.
Variety of surface finishes integrated within the element.	Surface finishes have to be applied later on the element.

## ADDITIONAL ADVANTAGES PF PRECAST CONCRETE

Structurally efficient, Precast products can be designed with a high depth ratio, reducing the need for additional columns and supports. Precast can also be designed with lightweight concrete to reduce dead loads and decrease the size of structural members and foundations.
High margins of design safety, The strength and resilience of precast concrete structures mean that extra safety is always built in, often well beyond what is required by design codes. In some cases, this benefit could be a life-saver.
Can support heavy loads, Where point loads or high bearing stresses are likely, the dense, high-quality reinforced concrete in a precast concrete structure is absolutely critical.
Can achieve high strengths, In civil engineering applications, high-strength concrete is often desirable, and precast components can be cast to meet such demands. If high early strengths are needed, this can be achieved through high-performance concrete, custom mix designs or accelerated curing methods at the plant.

# Precast Concrete Advantage

Concrete has been around for centuries made popular for its durability and aesthetic versatility. Adding to the many widely known benefits of concrete, precast concrete has its own unique set of strengths. Not only is it durable and versatile, it's easy on the environment and can significantly reduce construction time. While there are a multitude of benefits to using precast concrete, here are just 7 advantages to consider for your next building project.

## Control

- Control can often feel like an elusive concept in the construction industry. But using precast concrete allows you much more control over your job site and schedule. With offsite production, pieces are poured and cured in a controlled environment and then stored in a storage yard until they're needed at the jobsite. This means you get a high-quality product that requires less onsite labor and has less impact on the construction site.

## More Bang for Your Buck

- Because precast concrete is more easily controlled, the quality and durability is typically much better than cast-in-place concrete. A precast manufacturer is also more likely to receive greater discounts on materials due to the volume of purchases that can be made for multiple projects at a time. The amount of labor required to precast concrete is also far less than curing concrete on site. Add to that, precast concrete components that act as both the structural frame and architectural façade of a building and you've greatly reduced your material and labor costs. Like we said, more bang for your buck.

## Easy Installation

- Precast is manufactured offsite in a covered environment which means it isn't weather dependent like other site-cast products. Off-site manufacturing and just in time delivery allows for a cleaner, safer construction site and a project that is delivered on time.

## Top Quality and Durability

- Precast concrete is known for its high-quality and durability. It can easily withstand the elements and go through years and years of wear and tear while still being just as strong and resilient as it was the day it was cured.

## Noise Reduction

- Precast concrete is very dense and sturdy, making it a fantastic material choice for buildings where sound proofing is a top priority. Commercial buildings in large metropolitan areas often use precast concrete for this very reason. Multi-family residential and student dormitories also benefit from precast as it limits noise transfer from floor to floor.

## Fireproof

- One of the precast concrete advantages lies in its fireproof attributes. Precast concrete will not catch fire, and it will prevent the spreading of fire from room to room. It is a fantastic material to have a home or building made from for this very reason. In the event of a fire, the precast concrete will not get so hot as to drip molten particles and light other materials on fire.

## Aesthetics

- Long gone are the days of boring, gray concrete structures. With a variety of aggregates, shapes, colors and finishes, precast provides you with a multitude of options. Other materials such as brick, stone, and granite can be cast-in at the plant reducing the time, staging and cost of on-site installation. With a little creativity, you can achieve the look you desire for the cost and strength of precast concrete.

# Precast Concrete Advantage

# Residential Projects

<b>Project Name:</b>	Institute Public Administration (IPA) Housing
<b>Project Owner:</b>	Institute Public Administration
<b>Contractor:</b>	Alsaghyir Contracting Company
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture and erection of precast external walls, Boundary Wall and landscape items with white pigmented concert, washed (exposed aggregate) finish

<b>Project Name:</b>	ISHRAQ LIVING
<b>Project Owner:</b>	Ministry of Housing
<b>Contractor:</b>	Al-Tahaluf Real Estate Co.
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of full precast system

# Residential Projects

<b>Project Name:</b>	MOI - Housing - South Region
<b>Project Owner:</b>	Ministry of Interior
<b>Contractor:</b>	EL SEIF ENGINEERING CONTRACTING CO.
<b>Project Location:</b>	Jazan, Najran & Farasan
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of full precast system

<b>Project Name:</b>	Security Forces Medical Center Residential Villa Type 3 – 190 nos
<b>Project Owner:</b>	Ministry of Interior
<b>Contractor:</b>	ABV ROCK
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of full precast system

# Residential Projects

<b>Project Name:</b>	Jazan Housing
<b>Project Owner:</b>	King Abdullah Bin Abduaziz Foundation for Development
<b>Contractor:</b>	Beijing Emarates International Construction Co.
<b>Project Location:</b>	Jazan
<b>Scope of Work:</b>	Design, Manufacture and erection of precast Hollow Core (HC) Slabs (100 Villas) and precast Boundary Wall (20,000LM)

<b>Project Name:</b>	ESKAN HOUSING
<b>Project Owner:</b>	Ministry of Housing
<b>Contractor:</b>	Commercial Sea Company
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of Boundary Wall

# Educational Projects

<b>Project Name:</b>	Construction of Documentation Center Building
<b>Project Owner:</b>	King Saud University
<b>Contractor:</b>	Bin Dayel Contracting Co.
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of full precast system

<b>Project Name:</b>	Construction of Collage of Tourism & Cultural Heritage
<b>Project Owner:</b>	King Saud University
<b>Contractor:</b>	Bin Dayel Contracting Co.
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of full precast system

# Educational Projects

<b>Project Name:</b>	Collage of Management & Human Studies
<b>Project Owner:</b>	Islamic University
<b>Contractor:</b>	Al-Kifah Contracting Co.
<b>Project Location:</b>	Madinah
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of precast external claddings & Boundary Wall

<b>Project Name:</b>	Construction of Schools
<b>Project Owner:</b>	Ministry Of Education
<b>Contractor:</b>	Tebrak Trading & Contracting Company
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of precast Doable Tee (TT) Slabs & Hollow Core (HC) Slabs

# Educational Projects

<b>Project Name:</b>	Umm Al Qura University, (Preparatory Year Building 5+6)
<b>Project Owner:</b>	Umm Al-Qura University
<b>Contractor:</b>	Al Samman Brothers Co.
<b>Project Location:</b>	Makkah
<b>Scope of Work:</b>	Design, Manufacture and erection of precast Hollow Core (HC) Slabs & Claddings

<b>Project Name:</b>	Design, Manufacture, Transport and Erect of precast Elements
<b>Project Owner:</b>	Al-Qassim University
<b>Contractor:</b>	Rakan Trading & Contracting Company
<b>Project Location:</b>	Al-Qassim
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of precast Elements

# Educational Projects

<b>Project Name:</b>	Dammam University, College of Education (Girls)
<b>Project Owner:</b>	Dammam University
<b>Contractor:</b>	Saudi Arabian Artiyapi Company
<b>Project Location:</b>	Al-Khafji & Noyeriah
<b>Scope of Work:</b>	Design, Manufacture and erection of complete precast buildings

# Commercial Projects

<b>Project Name:</b>	Jarir Warehouse in Sullay
<b>Project Owner:</b>	Jarir Bookstore
<b>Contractor:</b>	Kite Arabia Ltd.
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, manufacture and erection of various precast elements

<b>Project Name:</b>	King Abdullah Economic City -Haramain High Speed Railway
<b>Project Owner:</b>	Saudi Railway Organization
<b>Contractor:</b>	El Seif Engineering Contracting Company Ltd.
<b>Project Location:</b>	Rabigh
<b>Scope of Work:</b>	Various Precast Elements

# Commercial Projects

<b>Project Name:</b>	Al-Qassim University, Sport Facilities (Stadium & Recreation Areas)
----------------------	---

<b>Project Owner:</b>	Al-Qassim University
-----------------------	----------------------

<b>Contractor:</b>	Al Samman Brothers Co.
--------------------	------------------------

<b>Project Location:</b>	Al-Qassim
--------------------------	-----------

<b>Scope of Work:</b>	Design, Manufacture and erection of precast Hollow Core (HC) Slabs, Wall Panels & seaters
-----------------------	---

<b>Project Name:</b>	King Abdulaziz Hospital Complex
----------------------	---------------------------------

<b>Project Owner:</b>	National Guard
-----------------------	----------------

<b>Contractor:</b>	Manazel Construction Company
--------------------	------------------------------

<b>Project Location:</b>	Riyadh
--------------------------	--------

<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of precast external claddings
-----------------------	--

# Multistore Car Park Projects

<b>Project Name:</b>	Car Parking
<b>Project Owner:</b>	Taiba University
<b>Contractor:</b>	Al-Dhahry Group of Companies
<b>Project Location:</b>	Madinah
<b>Scope of Work:</b>	Design, Manufacture and erection of complete precast Car Parking Building

<b>Project Name:</b>	Car Parking A & B
<b>Project Owner:</b>	King Faisal University
<b>Contractor:</b>	Al-Hashemiyah Company for Contracting
<b>Project Location:</b>	Al-Ahsa
<b>Scope of Work:</b>	Design, Manufacture and erection of complete precast Car Parking Building

# Boundary Wall Projects

<b>Project Name:</b>	Jeddah Residential Compound
<b>Project Owner:</b>	Al-Shawaf Family
<b>Contractor:</b>	SPECIALIZED CONTRACTING COMPANY
<b>Project Location:</b>	Jeddah
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of precast Boundary Wall

<b>Project Name:</b>	Extension of Al-Oruba Road & Abu Baker Al-Siddiq Road Through Riyadh Air Base – Boundary Wall
<b>Project Owner:</b>	High Commission for the Development of Arriyadh
<b>Contractor:</b>	Al Mabani General contractors Co.
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture, Transport and Erect of precast Boundary Wall

# Boundary Wall Projects

<b>Project Name:</b>	Princess Noura Bint Abdulrahman University for Woman
<b>Project Owner:</b>	Princess Noura Bint Abdulrahman University for Woman
<b>Contractor:</b>	El-Seif Engineering Contracting Company Ltd. & Consolidated Contractors Company, ESEC – CCC JV
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Precast Boundary Wall

<b>Project Name:</b>	SABIC Plastic Application Development Center
<b>Project Owner:</b>	SABIC
<b>Contractor:</b>	El Seif Engineering Contracting Company Ltd.
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture and erection of precast Boundary Wall

# Boundary Wall Projects

<b>Project Name:</b>	Buraidah Central Hospital Boundary Wall
<b>Project Owner:</b>	Ministry of Health
<b>Contractor:</b>	Horizon Contracting Company
<b>Project Location:</b>	Buraidah
<b>Scope of Work:</b>	Design, Manufacture and erection of precast Boundary Wall

<b>Project Name:</b>	Institute Public Administration (IPA) Housing
<b>Project Owner:</b>	Institute Public Administration
<b>Contractor:</b>	Haif Company
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture and erection of precast external walls, Boundary Wall and landscape items with white pigmented concert, washed (exposed aggregate) finish

# Boundary Wall Projects

<b>Project Name:</b>	Extension of Al-Oruba Road & Abu Baker Al-Siddiq Road Through Riyadh Air Base – Boundary Wall
<b>Project Owner:</b>	High Commissions for the Development of Arriyadh
<b>Contractor:</b>	Al Mabani General Contractors
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture and erection of precast Boundary Wall

<b>Project Name:</b>	Ayn Al-Shams Silos Ancillary Facilities – Boundary Wall
<b>Project Owner:</b>	Grain Silos and Flour Mills Organization GSFMO
<b>Contractor:</b>	Haif Company for Trading & Contracting
<b>Project Location:</b>	Makkah
<b>Scope of Work:</b>	Design, Manufacture and erection of precast Boundary Wall

# Public Projects

<b>Project Name:</b>	SABIC Plastic Application Development Center
<b>Project Owner:</b>	SABIC
<b>Contractor:</b>	El Seif Engineering Contracting Company Ltd.
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Doable Tee (TT) & Hollow Core (HC) slabs

<b>Project Name:</b>	MOI Extension
<b>Project Owner:</b>	Ministry of Interior
<b>Contractor:</b>	Cercon General Contractors
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture and erection of precast external claddings with white pigmented cement concrete, Doable Tee (TT) & Hollow Core (HC) slabs

# Public Projects

<b>Project Name:</b>	Pump Stations 1,2 & 3
<b>Project Owner:</b>	SWCC
<b>Contractor:</b>	Rabiah-Nassar & Zamil Concrete Industries
<b>Project Location:</b>	Ras Azour
<b>Scope of Work:</b>	Design, Manufacture and erection of precast external claddings with white pigmented concrete, sandblast finish

<b>Project Name:</b>	Foundations of GSM Tower
<b>Project Owner:</b>	Saudi Telecom / STC / Mobily
<b>Contractor:</b>	Knock Telecom, S.A. - Grupo Ormazabal, Spain
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Design, Manufacture, Delivery of precast foundations for GSM Tower

# Public Projects

<b>Project Name:</b>	University Colleges Complex General Site Infrastructure - Phase 2, Tent walkway, Columns & Seating
<b>Project Owner:</b>	Al Kharj University
<b>Contractor:</b>	Hady Contracting Est
<b>Project Location:</b>	Al-Kharj
<b>Scope of Work:</b>	Design, Manufacture and erection of precast 9 meters high special architectural columns and seating's

<b>Project Name:</b>	Princess Noura Bint Abdurrahman University for Woman
<b>Project Owner:</b>	Princess Noura Bint Abdurrahman University for Woman
<b>Contractor:</b>	El-Seif Engineering Contracting Company Ltd. & Consolidated Contractors Company, ESEC – CCC JV
<b>Project Location:</b>	Riyadh
<b>Scope of Work:</b>	Precast Bridge Walkway Precast Columns to Overhead steel Trellis

# ISO Certificates

## ISO 9001:2015

Verification  
INTERNATIONAL

Certification Awarded to  
RDB-ELSEIF Company Ltd.

Verification International certifies that the management system of the above organisation has been assessed and found to be in accordance with the requirements of the standard detailed below

STANDARD

ISO 14001:2004

SCOPE OF SUPPLY

Design, Production and Installation of Precast Structural Elements.

Original approval date: 15 January 2015

Subject to the continual satisfactory operation of the organisation's management system, this certificate is valid until:

30 December 2017

To check this certificate validity please call +44 (0)1909 211226

Further clarifications regarding the scope of this certificate and the applicability of the management system requirements may be obtained by consulting the organisation

Verification International

Certificate No: A15-541501018-01

Date issued: 15 January 2015

This certificate is awarded to the organisation for the following: Design, Production and Installation of Precast Structural Elements. The certificate holder is listed in the International Register of Quality Assurance Organizations (www.iso.org). The certificate is issued by Verification International, 10000, Wokingham, Wokingham, Hampshire, RG40 3EX, UK. Tel: +44 (0)1909 211226. www.verificationinternational.com
