GO BALANCE RANGE

(1) Go Balance Trike

(2) Go Balance Bike

(3) Go Balance Tandem

(4) Go Balance Scooter

The vehicles in this part of the range are designed to develop balance and coordination amongst the beginner riders of the group. Aside from the tandem walker, all of these vehicles are designed to be used by one child at a time.

GO COOPERATIVE RANGE

(5) Go Cooperative Duo Trike

(6) Go Cooperative Trio Trike

(7) Go Cooperative Taxi

(8) Go Cooperative Chariot

This selection of interesting styles have been designed to be used by multiple riders for cooperative play. Riders can choose to either sit in the driving seat, or take a back seat as a passenger.

The vehicles are numbered 1-8 using a dice pip system; and progress from 1 being the simplest to 8 being the most advanced for children to master. Each vehicle comes with an additional sticker, which can be placed to mark the parking space. Challenging children to find or park a specific number of bike will enhance their matching and subitising skills for maths.

Scan the QR Code or click here to watch a video of our prototype models in action.

Please note: design alterations have been made for production, reference the images in this PDF for final product design.
