

Grace
MEDICAL

INJECTABLES

DYSPOORT

Dysport is a neuromodulator meant to relax muscles, prevent dynamic facial movements, and smooth fine lines and wrinkles. Grace Medical Aesthetics' injectors prefer to use Dysport as our primary wrinkle relaxer. Dysport takes 3-5 days to show full results and tends to give a more natural looking result, meaning there is still some movement post injection without forming wrinkles. Dysport lasts about 4 months.

\$250 per area
\$230 per area as a Boutique Member

BOTOX

Botox is a neuromodulator meant to relax muscles, prevent dynamic facial movements, and smooth fine lines and wrinkles. Botox takes 7-10 days to show full results and tends to be associated with a "frozen" look, meaning there is very little to no movement post injection. Botox lasts about 4 months.

RESTYLANE

Restylane is a hyaluronic acid (HA) based dermal filler and the original filler in the Restylane family product line from Galderma. It is extremely versatile and can be used in most areas of the face. Specifically, Restylane is great for defining sharp borders of a lip or correcting volume loss in a deep tear trough. Depending on the area it is injected, Restylane lasts 6-9 months.

\$650 per syringe
\$575 per syringe as a Boutique Member

RESTYLANE KYSSSE

Favored in Europe over the last few years for lips, Restylane Kysse is finally FDA approved and available in the United States! Restylane Kysse is a hyaluronic acid (HA) based dermal filler that offers both a soft plump and strong definition. Charis Wipfler traveled to Sweden in October 2019 as a hand selected member of the Galderma New Product Advisory Board and was able to learn the about this revolutionary new product hands-on before it's arrival to the USA. Grace Medical Aesthetics' injectors find it the most suitable option for lip augmentation. Restylane Kysse lasts 6-9 months, depending on the area it is injected.

\$650 per syringe
\$575 as a Boutique Member

RESTYLANE LYFT

Restylane Lyft is a hyaluronic acid (HA) based dermal filler in the Restylane family product line from Galderma. It is the stiffest product in the line and best used for building structural definition in static areas of the face. Most commonly, Restylane Lyft is used by Grace Medical Aesthetics' injectors in the jawline, on the cheekbone, and to enhance chin projection. Restylane Lyft lasts 6-12 months.

\$650 per syringe
\$575 per syringe as a Boutique Member

RESTYLANE DEFYNE

Restylane Defyne is a hyaluronic acid (HA) based dermal filler in the Restylane family product line from Galderma. It is a malleable product that can provide structure in areas of the face with continued movement. It has structure, bounce, and elasticity. Restylane Defyne can be used in multiple areas of the face and Grace Medical Aesthetics' injectors find it best suited for shaping and plumping a lip, correcting shadowing and volume loss around the mouth, and in the deep tear trough. Restylane Defyne lasts 6-12 months, depending on the area it is injected.

\$650 per syringe
\$575 per syringe as a Boutique Member

RESTYLANE REFYNE

Restylane Refyne is a hyaluronic acid (HA) based dermal filler in the Restylane family product line from Galderma. It is the softest filler in this product line. It's unique ability to slide and stretch makes it ideal for hydrating the tissue in areas of repeated movement. Using Restylane Refyne to correct a tear trough allows for a soft, natural outcome. It can also be used in the lip on those looking for a soft appearing lip enhancement or those building volume in a naturally petite lip. Restylane Refyne lasts 6-12 months, depending on the area it is injected.

\$650 per syringe
\$575 per syringe as a Boutique Member

RESTYLANE CONTOUR

Restylane Contour is a hyaluronic acid (HA) based dermal filler in the Restylane family product line from Galderma. It is a malleable product that can provide soft filling in areas of the face where there are volume loss, continued movement, or shadowing. Restylane Contour can be used in multiple areas of the face and Grace Medical Aesthetics' injectors find it best suited for restoring definition in the cheeks, correcting shadowing and volume loss around the mouth, deep tear troughs, and temples. Restylane Contour can last about 6-12 months, depending on the area it is injected.

\$650 per syringe
\$575 per syringe as a Boutique Member

RESTYLANE SILK

Restylane Silk is a hyaluronic acid (HA) based dermal filler in the Restylane family product line from Galderma. It is indicated for fine lines around the mouth, tear troughs, and is FDA approved to be injected via microcannula into the lip. Restylane Silk lasts 3-6 months, depending on the area it is injected. It is not ideal for those looking for dramatic or lasting outcomes. Grace Medical Aesthetics' injectors do not choose Restylane Silk as an ideal product for most, however if a client is looking to "try on" an injectable treatment, Restylane Silk is a good option.

\$575 per syringe as a Boutique Member

RADIESSE

Radiesse is a calcium hydroxylapatite based dermal filler and the stiffest injectable product offered at Grace Medical Aesthetics. Radiesse is meant to build sharp, structural definition in the jawline, on the cheekbone, and in the chin. Radiesse is packaged in 1.5ml syringes and lasts 9-12 months.

\$750 per 1.5ml syringe
\$675 per syringe as a Boutique Member

SCULPTRA

Sculptra is a product that grows collagen wherever it is placed. This collagen grows over a 16 week period to restore volume loss and lasts 2-3 years. Sculptra may require multiple vials to be placed in a series spread out over a few appointments and once your goal result (in the face) is reached, typically only requires one additional vial per year.

\$700 per vial

KYBELLA

Kybella, or deoxycholic acid, is an injectable enzyme that permanently dissolves fat cells in small deposits on the body. It is the first injectable FDA approved to reduce submental fullness and the look of a double chin. Kybella can also be used on other parts of the body where there are unwanted small deposits of fat.

\$600 per vial

JUVEDERM ULTRA PLUS XC

Juvederm Ultra Plus XC is a hyaluronic acid (HA) dermal filler from Allergan. Juvederm Ultra Plus XC is most commonly used by Grace Medical Aesthetics' injectors for lip augmentations on those looking to achieve a specific look of fullness. Juvederm Ultra Plus XC typically lasts 6 months in the lip.

\$700 per syringe
\$625 per syringe as a Boutique Member

JUVEDERM VOLUMA

Voluma is a hyaluronic acid (HA) dermal filler from Allergan with the most stiffness out of their products. It is meant to build structural definition in the face, for example along the cheekbones, the jawline, or the chin. Voluma is said to last 24 months, however Grace Medical Aesthetics finds it lasts closer to 12-18 months.

\$850 per syringe
\$775 per syringe as a Boutique Member

BELOTERO

Belotero is a soft hyaluronic acid (HA) dermal filler from Merz. Belotero is best used in the neck for "tech neck" or "necklace" lines. Belotero lasts about 6 months, depending where it is injected.

\$600 per syringe
\$525 per syringe as a Boutique Member

THE BOUTIQUE MEMBERSHIP

Our injectable membership that allows you to bank money towards future (*discounted!*) injectable treatments with a monthly payment of \$55 or more.

Boutique members receive the following benefits:

Discounted Dysport per area - \$230

Discounted Botox per unit - \$13.75

\$75 off full syringes, \$30 off half syringes

As a boutique member, your monthly payment of \$55 or more is automatically banked into your Boutique Bank for later use on any wrinkle relaxer or dermal filler treatment. All of your banked funds go directly towards your treatment with no hidden fees. The Grace team can make a payment recommendation based on your current injectable treatment trends to help you budget for your next treatment.

As a thank you for signing up, your initial injectable treatment will be given to you with membership discounts. Your credit card will be automatically charged on the 1st of every month to deposit directly into your Boutique Bank. There is no additional sign up fee, membership fee, or cancellation fee.

If you do not have enough in your bank at the time of your appointment, you pay the remaining balance that day. If you have more than enough in your bank, the additional money remains in your account until you are ready to use it!

* Four month commitment required. Though members can cancel at any time, effective February 1st, 2018, all unused membership payments will be given as Grace Medical Aesthetics credit upon membership cancellation. No refunds will be issued at any time.

SKINCARE + LASER TREATMENTS

IPL

Intense pulse light therapy, frequently referred to as a photofacial, is a collagen stimulating treatment for fair to medium skin types. It is clinically validated and reigns as the gold standard for rosacea and redness complaints, as well as a multitude of hyper-pigmentation concerns. Pre-treatment with hydroquinone is common and sun avoidance is key, so it is important to note that a consultation is required prior to treatment. This is a fantastic maintenance treatment for skin as the results improve over time. Recommended once monthly in a series of four.*

1565 RESURFX FRACTIONATED LASER

We use the Lumenis ResurFx to provide a non-ablative skin resurfacing treatment. This fractionated laser treats superficial fine lines, acne scars, stretch marks, large pores, surgical scars, and overall textural issues (actinic keratosis included) with minimal downtime. Generally speaking, a ResurFx laser facial will leave you with a few days of redness, welting, and temporary roughness that is manageable with makeup. While results may vary, impressive results can usually be achieved with 3-5 treatments, spaced 4 weeks apart.*

\$225 al a carte
\$119 as a Facial Member

MICRONEEDLING

Microneedling is a treatment that uses a handheld device with multiple tiny needles to superficially damage the epidermis deep enough to stimulate collagen formation. The healing process and collagen stimulation can lead to improved skin texture, visibly smaller pores, diminished fine lines, and improvement of acne scarring.* Microneedling results are best seen when treatments are done every 4-6 weeks, until the significant results you're looking for are maintained.

\$225 al a carte
\$119 as a Facial Member

MICRONEEDLING WITH PRP

Your microneedling treatment can be boosted with even further healing and collagen stimulation when adding PRP (platelet-rich plasma) by drawing your blood, spinning it down via centrifuge, and harvesting out those precious "liquid gold" cells in a highly condensed plasma (PRP). The PRP is painted onto your face, neck, or décolleté and microneedled over to superficially inject it into your epidermis. Microneedling with PRP is not necessary more than every 4-6 months.

CHEMICAL PEEL

Superficial skin changes resulting from UV exposure lead to fine lines, wrinkles, and dark spots. Whether you need help with melasma, sun spots, adult acne, redness, fine lines and wrinkles, or simply want to start with prevention – Grace can appropriately direct you towards optimal skin, at any age, with the use of our customized chemical peels. Dubbed our "medifacial" thanks to the gentle, yet effective treatment.*

\$175 al a carte
\$119 as a Facial Member

VIVACE

Vivace uses microneedling with radio frequency technology to deliver skin tightening and collagen stimulation. The treatment itself is minimally invasive and offers little to no downtime. Vivace is unique to traditional microneedling in that the radio frequency uses 'heat' to damage the inner layers of the skin to offer optimal collagen stimulation. This in turn causes the skin to look more youthful, minimize the look of fine lines, pore size and overall skin tone and texture. A series of three treatments, spaced 4-6 weeks apart, is recommended for ideal results.

\$1,800 package of 3 treatments

DIAMONDGLOW

The DiamondGlow is an advanced skin-resurfacing treatment that combines exfoliation, extraction, and infusion of condition-specific serums (acne, hyper pigmentation, vitamin C, and hydration) to improve skin health, function, and appearance. This non-invasive treatment is fully customizable and the perfect treatment for all skin types and conditions. Great for "Red Carpet Events" or can be treated as a series for dramatic results!*

\$200 al a carte
\$119 as a Facial Member

OPUS PLASMA

A radiofrequency skin resurfacing technology using an innovative energy type to improve skin tone, texture, wrinkles & fine lines, scars, acne scars, & stretch marks. Like traditional laser skin resurfacing, Opus Plasma removes a small fraction of the skin, which stimulates the surrounding skin to repair itself. But unlike traditional laser-based skin resurfacing technologies, Opus Plasma uses a one-of-a-kind Plasma technology that precisely controls the energy-to-tissue contact time, minimizing unwanted inflammation that often leads to longer recovery. Clients will begin to enjoy noticeable improvements following the first treatment, although 2 to 3 treatments spaced 4-6 weeks apart are recommended for optimal results.

\$325 al a carte
\$238 as a Facial Member

OPUS FOCUS

Opus Focus uses the same innovative skin resurfacing technology to target small areas, like around the eyes or around the mouth, with precision. Opus Focus can be combined with the Opus Plasma or can be booked as a service on its own.

THE PERFECT PEEL

The Perfect Derma Peel is a quick and effective medium depth peel, safe for all skin types!* The Perfect Derma Peel offers many benefits, such as improvement of overall clarity, tone, and texture of the skin. The Perfect Derma Peel helps to eliminate hyperpigmentation, acne scars, sun damage and melasma. Stimulation of collagen production from this chemical peel results in firmer, more youthful skin and reduces the appearance of pore size. The Perfect Derma Peel can also improve acneic skin conditions.*

1064 COLLAGENESIS LASER FACIAL

One of our favorite additions to our skincare offerings is a 1064 Collagenesis Laser Facial courtesy of our Quanta EVO Q-Plus C; a restorative treatment used to improve the skin's texture and tone. This Photo Thermal 1064 Collagenesis facial has the ability to target vascular lesions, dark spots, fine lines and wrinkles, large pores, and acne scarring. The Quanta 1064 Collagenesis facial can also be performed in Q-Switched mode, meaning melasma and darker skin tones can be treated without the risk of hyper- or hypo-pigmentation. If acne is a concern, deep cystic acne can be treated with a higher intensity. Certain problem areas will be treated with varying degrees of aggression per treatment, but downtime is typically minimal.*

\$238 as a Facial Member

1064 EYE BRIGHTENING TREATMENT

Dark undereye circles can now be treated thanks to our Eye Brightening Treatment. This treatment uses our Quanta EVO Q-Plus C 1064 laser to gently target the pigment in the skin and water drawn to the undereye area to reduce the appearance of dark circles and undereye bags. The 1064 Eye Brightening treatment also stimulates collagen production in the skin to help to diminish the appearance of fine lines over time. We recommend this treatment be done in a series of 3, each treatment spaced 2 weeks apart. Results of lighter appearing undereyes and firmer, smoother looking skin can be kept up with treatment series done every 6-8 months.*

1064 Collagenesis Laser Facial
The Perfect Peel
Opus Plasma

\$100 discount on Vivace treatments

As a facial member, your monthly payment of \$119 is automatically banked into your Facial Bank for later use on a monthly skincare treatment of your choice. All of your banked funds go directly towards your treatment with no hidden fees.

Our practitioners will consult with you initially to set up a custom treatment plan to recommended what services are best for you, number of treatments, rotation of treatments, skincare products, etc. Your initial consultation comes with a 20% discount on all skincare products purchased that day.

Your credit card will be automatically charged on the 1st of every month to deposit directly into your Facial Bank. There is no additional sign up fee, membership fee, or cancellation fee. Any missed months automatically rollover to the next or can be used to upgrade a facial treatment.

* Four month commitment required. Though members can cancel at any time, effective February 1st, 2018, all unused membership payments will be given as Grace Medical Aesthetics credit upon membership cancellation. No refunds will be issued at any time.

LASER HAIR REMOVAL

Laser Hair Removal at Grace Medical Aesthetics is quick, painless, and effective. Our incredible laser nurses use the Alma Soprano Titanium, one of the best in the industry for optimal hair reduction.* This in-motion diode laser eliminates painful zaps associated with most hair removal treatments and the Titanium's continuous cooling tip keeps treatment completely comfortable. The Soprano Titanium is safe for all skin types and, thanks to the combined three most effective laser wavelengths for laser hair removal, most hair colors are able to be treated effectively while targeting different tissue depths and structures within the hair follicle.

THE LASER HAIR REMOVAL MEMBERSHIP

Our laser hair removal membership designed for monthly treatment of the area(s) of your choice with one of our laser nurses.

\$49 per month - extra small area:
upper lip | toes | nose | ears | chin

\$79 per month - small area:
underarms | cheeks | bikini line | belly trail | feet | hands

\$99 per month - medium area:
brazilian | full face | neck | shoulders | upper arms | lower arms | buttocks

full arms | upper legs | lower legs | upper back | lower back | chest | abdomen | brazilian + buttocks

\$199 per month - extra large area:
full legs | full chest + abdomen | full back

As a laser hair removal member, your monthly payment is automatically banked into your Laser Hair Removal Bank for later use on your monthly treatment. All of your banked funds go directly towards your treatment with no hidden fees.

Your credit card will be automatically charged on the 1st of every month to deposit directly into your Laser Hair Removal Bank. There is no additional sign up fee, membership fee, or cancellation fee. Any missed months automatically rollover to the next.

* Four month commitment required. Though members can cancel at any time, effective February 1st, 2018, all unused membership payments will be given as Grace Medical Aesthetics credit upon membership cancellation. No refunds will be issued at any time.

COOLSCULPTING

CoolSculpting is the revolutionary fat reduction treatment that offers a non-surgical alternative to liposuction for reducing unwanted body fat. As the #1 non-invasive body sculpting procedure, healthy men and women can finally reduce belly fat, thigh fat, love handles, a double chin, and practically any other stubborn fat deposit that resists diet and exercise. CoolSculpting is safe, natural looking, and impressively effective. Typical CoolSculpting results measured in clinical studies reveal an average reduction of 25% belly fat after one treatment with CoolSculpting.

priced per area; consultation required

ULTHERAPY

Ultherapy is a non-surgical face and neck treatment that uses ultrasound to stimulate collagen growth. This collagen stimulation helps to lift and tone loose or sagging skin with little to no downtime. Ultherapy can be used to lift the brow, lessen the appearance of jowls, and sharpen the jawline. Those concerned about loose submental skin are often drawn to Ultherapy to tighten the skin that gives the appearance of a double chin. Additionally, under eye bags and thinning décolleté skin can be improved using Ultherapy.* Ultherapy is the only FDA cleared, non-invasive skin tightening treatment that can specifically target the deep foundation below the skin that is addressed in cosmetic surgery without cutting or disrupting the surface of the skin. It is also the only procedure to use ultrasound imaging, which allows us to provide more precise, effective results. Using a customized treatment plan based on the ultrasound imaging, collagen is stimulated at various depths to provide our clients with the best treatment for their goal outcomes.*

priced per area; consultation required
